A dark, high-contrast photograph of a person's face, possibly a woman, with a small white rectangular object visible in the bottom right corner. The image is very dark, with the subject's features barely discernible against the black background. Figure 1 consists of seven panels (A-G) showing fluorescence micrographs of Drosophila ommatidia. Panels A, B, and C show control ommatidia with normal pigment distribution. Panels D, E, and F show ommatidia from a mutant fly with altered pigment distribution. Panel G shows a higher magnification of a single ommatidium from the mutant fly. Scale bars are present in each panel.
